- Figma
- TanStack Query
- Dotenv

## FEATURED PROJECTS

### Asset Management System [--preview](#)

I built this web application for managing assets, where HR managers can track asset availability, and approve or deny employee requests. Employees can also track their assets and submit new requests.

Technologies used: JavaScript, Node.js, React, MongoDB, and Tailwind CSS.

 [Github Repository](#)

### Bistro Boss Restaurant [--preview](#)

Bistro Boss Restaurant is a complete full-stack project that manage a restaurant. It has also different type of Admin and User to maintain the Restaurant.

Technologies used: JavaScript, Node.js, React, MongoDB, and Tailwind CSS.
